

SOUTH CAROLINA DEPARTMENT OF TRANSPORTATION

Qualified Rapid Patch Materials for Concrete Pavement

The expiration year indicates the year in which NTPEP retesting status and compliance with QPP 22 must be reconfirmed in order to remain on the list.

Products listed on QPL 22 do not require additional source of production documentation as indicated by the SCDOT Specification "Source of Production of Iron and Steel Products and Construction Materials" to be used on federal projects.

Note 1: The qualification of each product expires on December 31 of the year displayed. This is the 6th year after each product has been submitted to AASHTO for evaluation (presented in the AASHTO product code number). While products must be tested every 5 years, this extra time is added to account for the delay from the time products are submitted to AASHTO and the time the results are reported. Please account for this delay when submitting products to AASHTO, as products will be considered expired if the test result report is not completed by December 31 of the date displayed.
