

QUALIFIED PRODUCTS POLICY FOR  
SEDIMENT TUBES FOR DITCH CHECKS  
QUALIFIED PRODUCTS LIST 57

This policy covers Sediment Tubes for Ditch Checks for use as a temporary erosion control best management practice (BMP). Only use the products that appear on *Qualified Products List 57* by the SCDOT Office of Materials and Research. Prior to inclusion on *SCDOT Qualified Product List 57* provide the Office of Materials and Research (OMR) with the following information from the manufacturer:

- Written quality control program conforming to the requirements of the specification.
- Documentation of laboratory testing that quantifies the performance of the product conforming to the requirements of the specification.
  - Independent qualified test facility name and location,
  - Signature of responsible person or party certifying the Sediment Tube,
  - Sediment Tube manufacturer,
  - Sediment Tube name and model number,
  - Test ID, and
  - Test date.
- Certification that the Sediment Tube performs to the minimum performance standards under the specific conditions stated in the specification.
- Instructions on the proper installation and maintenance of the Sediment Tube.

Submit request for qualification to:
