

South Carolina Department of Transportation

Source Qualification Process
For Qualified Products Listing 67

Alternative Second Method Substructure Waterproofing

Only materials from sources appearing on the Department's Qualified Products Listing, titled "Second Method Waterproofing," as of the project's bid date shall be used for that project. A manufacturer may request approval by furnishing the following information to the Structural Materials Engineer:

1. A certification from the manufacturer that each shipment of material meets the requirements of **Section 814.2.3** of the SCDOT Standard Specifications. The certification shall include actual material test results from a recognized laboratory.
