

QUALIFIED PRODUCTS POLICY FOR
DEWATERING BAGS
QUALIFIED PRODUCTS LIST 80

This policy covers Dewatering Bags for use as a temporary sediment control best management practice (BMP). Only use the products that appear on *Qualified Products List 80* by the SCDOT Office of Materials and Research, or otherwise accepted by the Engineer. Prior to inclusion on *SCDOT Qualified Product List 80* provide the Office of Materials and Research (OMR) with the following information from the manufacturer:

- Written quality control program conforming to the requirements of the current version of Supplemental Technical Specification SC-M-815-15.
- Documentation of laboratory testing that quantifies the performance of the product conforming to the requirements of SC-M-815-15.
 - Independent qualified test facility name and location,
 - Signature of responsible person or party certifying the Dewatering Bag,
 - Dewatering Bag manufacturer,
 - Dewatering Bag name and model number,
 - Test ID, and
 - Test date.
- Certification that the Dewatering Bag performs to the minimum performance standards under the specific conditions stated in SC-M-815-15.
- Instructions on the proper installation and maintenance of the Dewatering Bag.

Submit request for qualification to:

G. Michael Lockman
Geotechnical Materials Engineer
