

QUALIFIED PRODUCTS POLICY FOR
PERIMETER CONTROL
QUALIFIED PRODUCTS LIST 84

This policy covers Perimeter Control for use as a temporary sediment control best management practice (BMP). Only use the products that appear on *Qualified Products List 84* by the SCDOT Office of Materials and Research. Prior to inclusion on *SCDOT Qualified Product List 84* provide the Office of Materials and Research (OMR) with the following information from the manufacturer:

- Written quality control program conforming to the requirements of the Specification.
- Documentation of laboratory testing that quantifies the performance of the product conforming to the requirements of the Specification.
 - Independent qualified test facility name and location,
 - Signature of responsible person or party certifying the Perimeter Control,
 - Perimeter Control manufacturer,
 - Perimeter Control name and model number,
 - Test ID, and
 - Test date.
- Certification that the Perimeter Control performs to the minimum performance standards under the specific conditions stated in the Specification.
- Instructions on the proper installation and maintenance of the Perimeter Control.

Submit request for qualification to:
