

QUALIFIED PRODUCT POLICY 97 FLASHERS AND EQUIPMENT

Flashers and equipment supplied for SCDOT work shall only be materials from sources appearing on the Qualified Products Listing 97, titled "Flashers and Equipment." The SCDOT Qualified Products List (QPL) for Flashers and Equipment contains products that comply with specifications set by the SCDOT Traffic Engineering Department which have been evaluated by SCDOT for inclusion on the QPL.

A designer, manufacturer, or distributor/vender wishing to submit an item for evaluation for the Flashers and Equipment QPL, should follow the guidelines specified by [The Evaluation Policy for Traffic Signal Equipment](#) as well as any additional requirements listed for this Policy*. Material specifications, warranty conditions, delivery and other requirements pertaining to this QPP can be found below.

- **Solar Powered Flasher Assembly:**
Material Specifications and warranty conditions set by SCDOT Traffic Engineering Department for Solar Powered Flasher Assemblies can be found at [M688.9](#).
- **Delivery:** *Product* deliveries should be made to 1430-B Shop Road, Columbia, SC 29201. Delivery arrangements must be coordinated at least five working days in advance of delivery with the SCDOT Evaluation Engineer.
- **Resubmittal:** *Items that do not meet SCDOT specifications and is deemed unsatisfactory for use in SCDOT projects by the Evaluation Engineer on the second occurrence cannot be submitted for reevaluation within 180 days of the most recent evaluation report.*

*There are no additional requirements for QPL 97.
