

QUALIFIED PRODUCTS POLICY FOR
ENHANCED STACKED DTICH CHECKS
QUALIFIED PRODUCTS LIST 99

This policy covers Enhanced Stacked Ditch Checks for use as a temporary sediment control best management practice (BMP). Only use the products that appear on *Qualified Products List 99* by the SCDOT Office of Materials and Research. Prior to inclusion on *SCDOT Qualified Product List 99* provide the Office of Materials and Research (OMR) with the following information from the manufacturer:

- Written quality control program conforming to the requirements of the specification.
- Documentation of laboratory testing that quantifies the performance of the product conforming to the requirements of the specification.
 - Independent qualified test facility name and location,
 - Signature of responsible person or party certifying the Enhanced Stacked Ditch Check,
 - Enhanced Stacked Ditch Check manufacturer,
 - Enhanced Stacked Ditch Check name, diameter(s) and model number,
 - Test ID, and
 - Test date.
- Certification that the Enhanced Stacked Ditch Check performs to the minimum performance standards under the specific conditions stated in the specification.
- Instructions on the proper installation and maintenance of the Enhanced Stacked Ditch Check.

Submit request for qualification to:
