

# KEY SAFETY ELEMENTS

## HIGH VISIBILITY CROSSWALKS/ADA RAMPS

- Heightens awareness of pedestrian crossing locations
- Improves pedestrian access

## PEDESTRIAN CROSSING

- Provides shorter, more direct crossings
- Refuge islands to allow staged crossings
- Midblock

## LEADING PEDESTRIAN INTERVALS

- Prioritizes pedestrians by providing “walk” signal before vehicles can enter the intersection

## COUNTDOWN SIGNAL HEADS

- Tells pedestrians how long they have to cross the intersection

## NEW PAVEMENT MARKINGS

- Improves drive guidance and lane visibility

## RETROREFLECTIVE BACKPLATES

- Reduces sun glare

## BICYCLE LANE SIGNS AND MARKINGS

- Alert drivers of bicyclist presence in designated lanes

## FLASHING YELLOW ARROW SIGNALS

- Heighten driver awareness during permissive left turns
